nd scolding because Moody gets \$200 a You will observe that the man who is ut-terly shocked because Francis Murphy is paid \$150 a week for temperance work, pulpit as on the stump. Is the man who is honestly trying to save your immortal soul worth less than the man who is trying his level best to go to Congress? Isn't Joody doing as good work as Ingersoll? Isn't John B. Gough as much the friend of humanity and society as the bartender? Do you want to get all the good in the world for nothing, so that you may be able to pay a high price for the bad? Remember, my boy, the good things in the world are always the cheapest. Spring water costs less than corn whisky; a box of cigars will buy two or three Bibies; a gallon of old brandy costs more than a barrel of flour; a "full hand" at poker often costs a man more in twenty minutes than his church subscription amounts to in three years; a State election costs more than a revival of religion.

years; a State election costs more than a revival of religion.

You can sleep in church every Sunday morning for nothing, if you are mean enough to dead beat your lodging in that way, hat a nap in a Pullman car costs you \$2 every time; 50 cents for the circus, and penny for the little ones to put into the missionary box; \$1 for the theatre, and a pair of old trousers, frayed at the ends, baggy at the knees, and utterly burst at the dome, for the the Michigan sufferer; the dancing lady gets \$500 a week, and the city missionary gets \$500 a year; the horse race scoops in \$2,000 the first day, and the church fair lasts a week, works twenty-five or thirty of the best women in America nearly to death, and comes out \$40 in debt—why, my boy, if you ever find \$40 in debt—why, my boy, if you ever find yourself sneering and scoffing because once in awhile you hear of a preacher getting a living or even a luxurious salary, or a tem-perance worker making money, go out into the dark and feel ashamed of yourself, into the dark and feel ashamed of yourself, and if you don't feel above kicking a mean man, kick yourself. Precious little does religion and charity cost the world, my boy, and when the money it does get is flung, into its face, like a bone to a dog, the donor is not benefitted by the gift, and the receiver is not, and certainly should not be, grateful.

COUNTRY ROADS.

Why It Pays to Make Them G od.

Why It Pays to Make Them G. od.

Chicago Tribusa.

Arguments in favor of good wagon roads are many and strong. They are such as will readily occur to any one who has had experience in hauling heavy loads or in riding over the ordinary country highway in or soon after wet weather. It may be said that no natural unimproved road in this part of the country, except, perhaps, one over a gravelly soil, is fit for use at all seasons. Clay soil forms a tough and sticky mud which makes walking extremely tiresome, and which inge extremely tiresome, and which inge extremely to passing wheels, increasing greatly the labor of hauling even an empty wagon. It renders almost impossible the hauling of a fair load in wet weather. When the mud dries it is into the control of the country highway in the cheeps and sticky mud which makes walking even an empty wagon. It renders almost impossible the hauling of a fair load in wet weather. When the mud dries it is finosed to the country have the cheeps and sticky mud which makes walking even an empty wagon. Meanwhile the tongue thrashes about constantly, pounding the shoulders of the horses and galling necks and breasts unmercifully. The wagonmaker and the horse doctor

The wagonmaker and the horse doctor may be benefited by it. Certainly no one else can be.

That the animal loss to the farmers of America from the lack of hard, smooth, and dry roads is immensely greater than all the taxes they have to bear, local and general, can be easily shown. That they have the remedy for this largely in their own hands is undoubtedly true. That they will unite in demanding that the State laws shall be so changed as to encourage, by substantial aid where need be, the making of such roads as are needed is to be devoutly hoped. The people of the cities and towns may not feel that they should be taxed to help pay for improvements which would inure directly to the benefit of the farmers alone; but the consumer can scarcely fail to get some benefit from a work which will lesson so materially the cost of food by reducing the expense of placing that food upon the market.

By removing roadside fences and cultivating the soil to the roadbed, or by grading it down and using it for raising hay, the whole country would be made immeasurably more attractive than it can ever be with a lot of roadside fences, with their usual attendant evils, disfiguring the land-scape. The cost of keeping useless fences in repair would go far toward keeping the roads in good order. At a low estimate roadside fences will cost \$640 per mile.
